DETAILED ACTION

Response to Amendment

1. Amendment filed on 08/17/2006 has been entered. Claims 14 and 15 have been canceled. Claims 1-13 and 16-21 are pending in the application.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should any changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Honeycutt on November 7, 2006.

- in claim 16, line 1, replacing "claim 1, wherein the impurities of the first and second halo regions comprise boron, BF₂ or indium" with --claim 8, wherein the impurities of the halo regions for the first group of transistors comprise boron, BF₂ or indium--.
- in claim 17, line 1, replacing "claim 1, wherein the impurities of the first and second halo regions comprise phosphorus, arsenic or antimony" with --claim 8, wherein the impurities of the halo regions for the first group of transistors comprise phosphorus, arsenic or antimony--.
- cancel claims 1-7.

Allowable Subject Matter

3. Claims 8-13 and 16-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2818

As to claim 8, the prior art of record taken along or in combination, fails to teach or reasonably suggests forming halo regions for the first group of transistors by implanting the substrate with impurities in a first direction substantially perpendicular to the first axis, and implanting the substrate with impurities in a second direction substantially opposite the first direction and substantially perpendicular to the first axis, and without implanting impurities in a direction substantially parallel to the first axis; and forming halo regions for the second group of transistors by implanting the substrate with impurities in a third direction substantially perpendicular to the second axis, and implanting the substrate with impurities in a fourth direction substantially opposite the third direction and substantially perpendicular to the second axis, and without implanting impurities in a direction substantially parallel to the second axis.

As to claim 18, the prior art of record taken along or in combination, fails to teach or reasonably suggests wherein the first and second halo regions of the first group of n-channel transistors and the first group of p-channel transistors are formed without implanting impurities in a direction substantially perpendicular to the first and second directions, and the third and fourth halo regions of the second group of n-channel transistors and the second group of p-channel transistors are formed without implanting impurities in a direction substantially perpendicular to the third and fourth directions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Art Unit: 2818
